Premaberg Manufacturing Limited Quality, Health, and Safety Policy Statement

It is the policy of Premaberg Manufacturing Ltd to operate an integrated quality and health and safety management system that will meet the requirements of BS EN ISO9001:2015 and BS EN ISO45001:2018. This policy, along with the Integrated Management System Manual (IMS) and The Group Operating procedures accurately describe these Management Systems in use.

The Executive Directors and Management Team will show leadership and commitment and bear the responsibility for establishing, implementing, integrating and maintaining the IMS Management System.

The company is committed to the involvement of all employees in the operation of the IMS management system through education and training to achieve the expectations of its stakeholders and assure continual improvement.

The objectives of the quality management system are to ensure that:

- Products and services meet or exceed customer requirements and expectations.
- The use of positive and negative risks and opportunities to ensure that customer focus is both maintained and enhanced.
- Products and services comply with applicable standards (including ISO 9001:2015), codes, specifications, statutory and regulatory requirements.
- The resources needed for the quality management system are available.
- The quality management system achieves intended results through the use of internal auditing, monitoring, measuring, recording and analysis of product and processes.
- Risk based thinking and the context of the organisation is used to carry out strategic planning.
- They promote improvement, PDCA and the process approach within the framework of the organisation.

The objectives of the health and safety management system are to ensure that:

- They drive a commitment to provide and maintain safe working conditions for the prevention of work-related injury and ill health, including safe access and egress without risk to Health and Safety.
- There is effective identification and risk assessments in place to eliminate hazards, including the implementation of appropriate preventive or protective measures where identified, whilst being appropriate to the purpose, size and context of the organization.
- All equipment, facilities, substances and working practices are safe, without undue risk that includes a commitment to continual improvement of the Health and Safety management system.
- They provide a framework for setting the Health and Safety objectives, and a commitment to fulfil legal and other requirements.
